## Course Title: Forklift Truck Operator

### Course Overview:

Professional Instructors carry out our Forklift Training to RTITB and CPCS standard. The Course is carried out over the following duration dependant on each delegate's experience.

### Course Objectives:

Novice Operators	5 days training required
Experienced Operator with no Certificate	2 days training required
Experienced Operator and Renewal of Certificate (Refresher)	½ days training required

This will include practical and theory elements and a test at the end of the training to determine the delegate's level of competence.

All training will be carried out on your site.

### Course Content:

- Basic Maintenance
- Driver/Operator Techniques
- Correct use of Controls
- Lifting Techniques and Weight Assessment
- Specific Load Training
- Safety Precautions
- Pre-test preparation
- Theoretical Safety Code and Stability Lectures
- Safety Video
- Theoretical/Practical Testing

**NB: Should the trainer, on the day of assessment, determine that further training is required, additional days maybe needed.**
