

IDM Safety Training Services Limited

Basic Fire Safety Awareness

Current legislation, The Regulatory Reform (Fire Safety) Order 2005, applies to all workplaces regardless of the number of employees and requires employers to provide adequate training in fire awareness for all members of their staff.

Our online fire safety training courses are aimed at all employees to assist them in identifying and reducing the risk that fire presents in the workplace.

This course will provide candidates with a general understanding of basic fire awareness including what should be done in the event of a fire, how to prevent a fire occurring and a basic introduction of the protocol of extinguishing a fire.

It is a cost effective way for employers to fulfil their legal obligation to provide their employees with the necessary understanding of fire awareness.

Course	Module Number	Module Name	Pass % Required
Basic Fire Safety Awareness	1	Chemistry of Fire	70
